The General Accounting Office has been requested to review implementation of the Missile Technology Control Regime agreement. The agreement was concluded by the United States and six other countries in April 1987 for the purpose of limiting the proliferation of missiles capable of delivering nuclear weapons.

In performing the review we plan to examine the organizations implementing the agreement to determine (1) their policies and procedures for carrying out the agreement, (2) the number of skilled personnel assigned to review export requests for missile related parts, components and technology, and (3) the effectiveness of inter-agency coordination and between member countries. We will also examine the review process by looking at some export cases that have been approved, rejected or are pending.

In performing the review we will also need to examine the input and support being provided by the intelligence agencies. We note that pertinent National Security Decision Directives assign a significant responsible to the Central Intelligence Agency in support of the Regime.

The work will be performed by the Security and International Relations Group under assignment code 467333. It will be under the overall direction of Mr. Albert H. Huntington, III, Group Director, and Raymond A. Plunkett, evaluator-in-charge. If you have any questions regarding the study, please contact Mr. Huntington on 557-1469 or Mr. Plunkett on 557-1498.
